

Presenting
the First
and Only
Intelligent
Pool Care
System...

The Sustain® 3-Part System.

Sustain® Summer Shield® chlorine extender –

the brains of the system – stores chlorine and automatically releases it on demand. If the chlorine level should drop suddenly following a rainstorm, or some other unforeseen occurrence, your pool is temporarily protected. Summer Shield chlorine extender works like a chemical sponge soaking up excess chlorine that results during routine shocking and is usually lost. This excess is then *shielded* or contained and is only *squeezed* out when needed most. One application of *patented* Summer Shield extender lasts 150 days*.

One quart per
10,000 gallons

3 Easy Steps...

1

Once a season,
use Sustain
Summer Shield
chlorine extender.

Sustain® 3-inch BLUE Calcium Hypochlorite

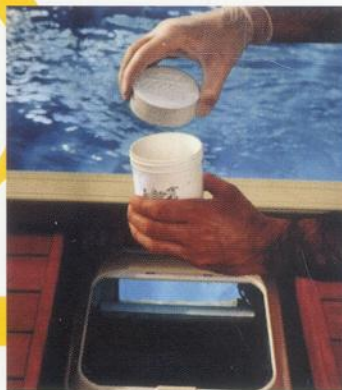

Tablets contain 65% available chlorine...uniform, controlled, consistent chlorination because of a unique, *patented* erosion modifier.

Exclusive BLUE colored
tablets**

One tablet per
10,000 gallons

2

Once a week,
fill the adjustable
skimmer dispenser
cup with Sustain
3-inch BLUE
Chlorinating
Tablets.

Sustain® 11-inch BLUE Shield Energizer Tablets

designed for
double duty:

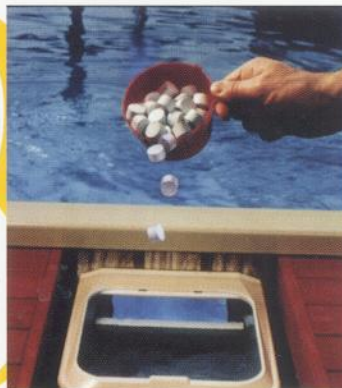

- 1) Recharges chlorine in Sustain Summer Shield chlorine extender...
- 2) Provides routine shocking power.

Exclusive BLUE colored
tablets**

One capful (8 oz.)
per 5,000 gallons

3

Once a week,
add Sustain
11-inch BLUE
Shield Energizer
Tablets to the
skimmer.

The intelligent way to open your pool

It's easy to get the season off to a great start. Follow your pool professional's directions for balancing and stabilizing your pool water as usual. Then, use Sustain Shock Treatment to reach a level of 1 to 3 ppm free available chlorine. Following the label directions, add Sustain Summer Shield chlorine extender, 3-inch BLUE Sustain Tablets, and Sustain Energizer Tablets. Now the pool's open and your protection's ready for the season.

...and enjoy your pool, season after season!

People who start with the Sustain System, stay with it. It's clear. The Sustain System really works. To keep it working in your pool, just follow the easy directions in The Guide to Intelligent Pool Care. And for expert professional intelligence, count on your authorized Sustain System dealer for proven solutions, plus a full complement of specialty Sustain System products.

Sustain.

The intelligent choice.

Protection during winter...

At the end of the season, balance the water. Then use unique Sustain Winter Shield to help maintain chlorine protection against algae all winter. Add Sustain Shock Treatment as directed; clean, partially drain, and cover the pool. Next season, your pool will be ready for easy opening.

Contents: the know-how of a leading authority.

The Sustain System is the exclusive product of PPG Industries, an acknowledged leader in swimming pool chemicals. Now you can apply that expertise to protect your swimming pool. Taking good care of your pool takes intelligence and experience. That's what you get in the unique Sustain 3-Part Pool Care System. Any way you look at it, the first and only intelligent pool care system is clearly the most intelligent choice.

100% algae-free performance!

The results are brilliant: clean, clear, sparkling, 100% algae-free water, all season long. All season, you can depend on the unique protection of the Sustain® System 100% Algae-Free Limited Warranty. If you ever have an algae problem, your authorized Sustain System dealer will select and furnish the chemicals to solve the problem free of charge.*** Period.

The Sustain System gives you the only performance-proven warranty around, proven over a decade in the market. Thousands of pool owners nationwide depend on the Sustain System for assured, long-lasting protection.

Sustain tablets last longer

Other chlorinating tablets *dissolve* quickly, releasing high levels of both chlorine and acidic chemicals that may cause problems with water balance, bleached liners and the things you don't see like pool equipment. Sustain BLUE Calcium Hypochlorite Tablets used with the unique and adjustable skimmer cup, *erode* gradually for steady, reliable chlorine delivery *without* acidity.

Based on laboratory tests, February 1998.

* Heavy rainfall, dilution, or other factors could affect performance. Check with your authorized Sustain System dealer periodically (every 6 weeks) to be sure that your pool contains enough Sustain Summer Shield chlorine extender.

** Never mix blue and white (typically stabilized chlorine) tablets. Mixing could result in fire or explosion. Do not use either 3-inch or 11-inch Sustain Tablets in floating feeders; also, do not use Sustain 11-inch Shield Energizer Tablets in automatic chlorinators.

*** This is a limited warranty, and certain restrictions may apply. Periodic water testing by your Sustain System dealer (every 6 weeks) is part of the limited warranty. The Sustain Pool Care System must be used according to label and start-up directions. If algae develop within 150 days of pool start-up, you will be furnished with proper algae treatment chemicals to restore the pool to an algae-free condition at no cost. Ask your authorized Sustain System dealer for full details.
